RESUME

Web Developer with experience in building end-to-end applications, from interface design to database management. On the backend, specialized in creating secure, scalable APIs, database administration (MySQL, MongoDB, Oracle), and handling authentication and authorization. On the frontend, proficient in React, Angular, HTML/CSS, and Figma to develop intuitive and accessible interfaces. Adaptable to new technologies and environments, I seek to contribute to challenging projects where I can add value and continue growing my web development skills.

WORK EXPERIENCE

- **Freelancer: Workana, Turing** 06/2023
  - Web application development with React and NestJS, general management and administration of web pages with WordPress, WooCommerce, and Shopify.

- **Airtrace Technologies SL** 02/2023
  - Created a responsive landing page using React, HTML, CSS, and JavaScript. Collaborated in decision-making on the website's design, content, and UX.

- **Freakfactory** 12/2018-09/2021
  - General management and administration of a website with WordPress and WooCommerce.
